

Best Kitchen Renovation Ideas in Cincinnati

There's a reason the kitchen is considered the heart of the home. It's where you start your day with that morning cup of coffee, where hours are spent preparing delicious food, and where people can gather together eating said food and enjoying conversation. So why wouldn't you want to make the room you spend the most time in look and function the best that it can?

Remark Construction in Fairfield, OH delivers the best high-quality kitchen renovation services across the Cincinnati and West Chester areas. There are endless kitchen reno ideas to fit the size of your space and your budget, from small personal touches to more extensive kitchen updates.

Island Counters

If you've got the room for them, installing island counters is a great way to add more cooking space that doubles as a place to eat, work, sit, or even be used as a bar space. You can also choose an island that has drawers or shelves for extra storage, or a built-in wine or glass rack. Match the island to your cabinets or choose a contrasting paint color or wood tone to make it stand out.

Updated Appliances

What good would a kitchen reno be if your refrigerator buzzes and that one burner on the stove just won't light? Ensuring your kitchen works as good as it looks is just as important. Stainless steel is always a classic choice for appliances, but black is great for adding a sleek, modern look, and white works for a lot of styles ranging from contemporary to farmhouse. Fun pops of color like red and mint blue are also available for that retro feel.

Lighting and Fixtures

Simple changes to your sink, faucet, and lighting can work wonders for your kitchen remodel and can be incorporated into a lot of styles. You can match them to your appliances or make them stand out. Bronze, copper, and brass fixtures can add a touch of warmth with some vintage flair, while silver, stainless steel, and black are great for classic, contemporary, and ultra-modern styles. Choose recessed lighting for subtlety or make the lighting the center of attention with a chandelier.

Backsplashes

No more scrubbing away at the splattered spaghetti sauce on the wall, just effortlessly wipe it off the backsplash. Kitchen backsplashes are a great option for adding more style and functionality to your space. White subway tiles are always in, but interesting shapes such as chevron, penny, and herringbone provide a unique and fun look. Ceramic, porcelain, and glass are popular materials, but there's also brick if you want a more industrial look. White, black, and gray are popular colors, but you can choose virtually any color for your backsplash; there are even multi-colored options.

From Mason and Loveland to across the Cincinnati area, Remark Construction can help you figure out your design goals and bring your kitchen to life.
